

## Networked Intelligence for Transforming Education

Education Impact is a global fellowship of international experts in education and ICT dedicated to helping governments and educational institutions improve and transform education systems.

Much has been written about the urgent need for the reform and transformation of school systems around the world. As we enter the second decade of this millennium, the imperative to act has never been more evident. The importance of ensuring that the appropriate direction is taken and the best strategies implemented has never been more important for the future of nations.

Education Impact can help you make informed decisions and deliver the best solutions.

### About Education Impact

Education Impact is an independent international consultancy with a global network of Fellows that include some of the world's leading and most experienced education consultants and experts.

The Fellows of Education Impact collectively have worked across five continents influencing the educational development of well over 200,000 schools, the training of thousands of school leaders and tens of thousands of teachers. We are at the leading edge of understanding and applying emerging educational practices in institutions, classrooms and the home.

Our experience transcends policy and practice issues, public and private sector developments and international and regional borders. Our business is to provide solutions to key educational challenges in a manner that is appropriate for your context.

### The Challenges

Through its global network of education professionals, Education Impact addresses five critical challenges facing educational policy leaders today:

#### 1. Improve student achievement and equality of opportunity

Provide universal access, improve student achievement and reduce gaps in student learning.

#### 2. Prepare for a technology-rich world

Transform educational systems to help ensure that learners have the knowledge, skills and attitudes to be successful in the technology-rich world of the 21st century.

#### 3. Support teachers' development

Provide teachers and faculty with professional development opportunities to excel at their work.

#### 4. Promote continuous improvement

Build capacity for continuous improvement of educational institutions and their constituents.

#### 5. Improve policy and strategy decision making

Advance better evaluation and data-based decision making for more efficient and systemic educational policies.

## Our Customers: Public, Civil and Private Sectors

The breadth of experience of Education Impact Fellows permits us to serve the needs of public, civil society and private sector customers. Our customers include public sector organisations from ministries of education to educational institutions, private sector organisations from multinationals to emerging ICT companies and civil society organisations from donor organizations and foundations to development banks.

Our Fellows have extensive experience working with educational decision makers at ministries, regional, national and district education offices and with all levels of educational institutions including early childhood, primary and secondary schools, higher education, further/life-long education, public, private, academic and vocational institutions. The global reach and broad experience of our Fellows provide our customers with access to an unrivalled network of education professionals and organisations from around the world.

## How We Work: Pragmatic, Contextual and Relevant

Education Impact Fellows are united in their commitment to providing the highest quality consultation and evidence-based advice to educational leaders. To achieve this we work in a manner that helps ensure:

### Close engagement and tailored solutions

Close engagement with customers to provide solutions tailored to organisational and cultural contexts.

### Stakeholder participation

Participation of stakeholders in the design, development and implementation processes.

### Holistic approach

A holistic, systemic approach to planning and managing change.

### Capacity building

Building human, organisational and technical capacities to strengthen educational systems.

### Technology application

Advice on the appropriate, effective and efficient use of information technology.

### Best practices

Access to international best practices and comparative studies to optimize understanding.

## How We Can Help: Education Impact Services

**The breadth of experience of Education Impact Fellows allows us to serve the needs of many different public, civil society and private sector customers at all levels of pre- and post-secondary education. Our services include:**

### Independent counsel

Providing education leaders with independent counsel on matters of educational policy, strategy, market development and regulatory reform.

### Visions, strategies, plans and programmes

Working with education leaders to develop effective visions and strategies and sustainable programmes to build educational systems that meet the needs of countries and communities.

### Harness the power of technology

Planning for the application of technology to improve outcomes for all learners and to strengthen management processes, decision support, analysis and planning.

### Supporting educational leaders and engaging stakeholders

Assisting educational leaders to help engage stakeholders in meaningful discussions about education system development, transformation and the role of technology in supporting and facilitating change.

### Programme management

Working with international agencies and other world bodies to design, develop, implement, monitor and evaluate large-scale programmes and projects.

### Professional development

- Creation of professional development programmes for school leaders and for teachers regarding the use of information technology in the classroom.
- Developing ICT-enhanced curriculum and pedagogy.
- Developing professional communities of practice.

### Seminars and workshops

Designing, developing and implementing seminars and workshops on educational challenges such as one-to-one computing, strategic planning and managing organizational change.
